RackFill Blanking Panels

Large Format Blanking Panels Install Quickly to
Fill Empty Rack Spaces in Server Cabinets and Racks

Cost-effective, fire-rated polycarbonate panels seal empty and sparsely filled cabinets

RackFill blanking panels combine performance, versatility and low cost in one innovative solution. Panels ship standard with multiple mounting options including round hole (telecom) push-in clips, square hole push-in clips and high-performance magnetic discs.

All options allow data center managers to use the lightweight yet rigid panels to fill empty rack spaces or entire cabinets in literally seconds. RackFill panels are available in 5U to 27U sizes. All panels feature perforated scores in 1U increments to allow the panels to be quickly and accurately cut to any size needed as hardware is added. Panels can be cut in seconds with a common utility knife or scissors.

Specially formulated plastic resins have allowed RackFill panels to achieve ASTM E84 highest Class A fire rating. In fact, the flame spread and smoke density rates are so low that they are also approved to be used in plenum spaces. There are no other blanking panel solutions available which can match the combination of features that RackFill offers.

FEATURES

- Ships with multiple toolless mounting options to install in any server rack or cabinet

- Rigid, lightweight material does not sag to maintain tight seal between panels

- Perforated in 1U increment to allow easy cutting to size when hardware is added

- Custom formulated resins achieve exceptional fire rating exceeding NFPA data center standards

- Available in 42U, 44U, 45U, 47U and 48U kits for sealing empty cabinets

SPECIFICATIONS

- E84 Class A Fire Rating exceeds NFPA 75 and 76 Data Center Standards

- Available in 5U to 27U sizes for both 19" and 23" Rack Mount cabinets

- Panels available in black or white color

- Panels ship with adhesive magnetic discs and push-in clips for both round and square hole rails
